

A close-up of a person's face, focusing on their eyes. The left eye contains a glowing green number '8', and the right eye contains a glowing blue number '12'. Two speech bubbles are present: one on the left pointing to the '8' eye and one on the right pointing to the '12' eye.

This is it.

The final test.

12

Wait until the tissue is fully stable, usually 8 to 12 weeks after resolution.

The epic conclusion is just enjoying a cup of tea.
